About Me

Fourth-year Software Engineering undergraduate at the University of Kelaniya with hands-on experience in full-stack development, REST APIs, Chrome extensions, and AI-enabled apps. Skilled in Next.js, React.js, TypeScript, Node.js, Express.js, and MongoDB. A proactive team player with experience in debugging, refactoring, secure API integration, and agile development who quickly adapts to new technologies.

Education

B.Sc. (Hons.) Software Engineering

Jul 2023 – Present

University of Kelaniya, Sri Lanka

Current GPA: 3.51/4.00

Domains: Advanced Web Applications, Mobile Computing Applications, Data Science & Engineering Applications

GCE A/L (Physical Science Stream)

2019 – 2022

Sri Sumangala College, Wariyapola

Z-Score: 1.61 Combined Maths: B Physics: A Chemistry: B

Internship Experience

Software Engineering Intern — ByteSquad Labs

Sep 2025 – Mar 2026

Duration: 6 months — Tech Stack: Next.js, React.js, TypeScript, Node.js, Express.js, MongoDB

Contributed to production-grade web applications and Chrome extensions involving REST APIs, AI workflows, blockchain analytics, and secure crypto-payment integrations in an agile environment.

Olney Labs (Token Analytics Platform): Built token analytics features using Solana APIs, including token evaluation tools, wallet portfolio insights, and crypto news aggregation with scalable API integration.

AI Chatbot & X402 Payment Integration: Implemented crypto-focused AI workflows using OpenAI APIs and integrated Coinbase's X402 protocol with secure transaction validation before enabling premium chatbot features.

Focus/Time - Tracking Web Application: Implemented task duration tracking and UI improvements to refine user workflows and strengthen usability and state handling.

Engineering Practices: Worked in Jira-based sprints, debugged and refactored applications, implemented Figma designs, and followed maintainable coding, API security, and environment configuration practices.

Chrome Extensions Developed and Enhanced:

- **AnchorGPT** – Added pinned responses and color-coded organization for improved ChatGPT usability.
- **Tech Copilot** – Built extension UI, backend integration, and streaming AI responses with improved OCR handling.
- **Tabily** – Implemented auto backup/restore, task management, star ratings, and refactored architecture.
- **Instagram Automation Extension** – Built automated follower list processing and username extraction workflows.

Projects

Web Development

Kochi Guru Pizza - Pizza Shop Web App (Client Project, Ongoing)

Next.js, Express, MongoDB

Developing a real-world pizza shop web application for a client using Next.js and Express.js. Implemented user authentication with JWT-based session handling and protected REST API endpoints for user profile management. Currently working on menu management, cart functionality, order processing, and admin dashboard features tailored towards business requirements.

GitHub: [kochi-guru-pizza](#) Live Demo

ConstructPro ERP - Construction Management System (Group, Ongoing)

Next.js, TypeScript, NestJS, PostgreSQL, Prisma, Docker

Contributing to the design and development of a client-based ERP system for managing leads, quotations, construction projects, invoices, payments, documents, and analytics. Working on backend modules using REST APIs, JWT authentication, role-based access control, PostgreSQL, and modular service architecture.

GitHub: [ConstructPro-ERP](#) Vercel: [Live Demo](#)

BrewHub - Coffee Shop Web App (Individual, 2025)

MERN, Tailwind CSS

Developed a full-stack coffee shop platform with a responsive React and Tailwind CSS frontend and an Express-MongoDB backend, enabling users to browse the menu, manage carts, place orders, and access features securely.

GitHub: [BrewHub](#) Vercel: [Live Demo](#)

FuelWise.lk - Fuel Quota Management System (Group, 2024)

Spring Boot, React, Flutter, MySQL

Built a multi-role fuel quota management platform using Spring Boot, React, and Flutter, enabling real-time quota tracking, station-wise fuel updates, and efficient fuel distribution for users, stations, and administrators.

GitHub: [FuelWiseLK](#)

Mobile App Development

TaskMaster - Task Management App (Individual, 2025)

React Native CLI, AsyncStorage

Built a lightweight To-Do-List application with centralized state management using Zustand and persistent storage via AsyncStorage. Supports task creation, completion tracking, and deletion with a clean and intuitive user interface.

GitHub: [TaskMaster](#)

HabitBuddy - Habit Tracking Mobile App (Individual, 2025)

React Native CLI, AsyncStorage

Built a habit tracking mobile application with authentication, tab-based navigation, and habit management features. Enables users to create, edit, and track daily habits with progress monitoring and persistent local storage for seamless data retention across sessions.

GitHub: [HabitBuddy](#)

Research and AI

CloudHeal - AI-Assisted CI/CD Failure Resolution (Research Project, Ongoing)

Python, Qwen2.5-Coder, LoRA, RAG, GitHub Integration, PostgreSQL, pgvector

Contributed to an AI-assisted system for CI/CD failure analysis and fix generation. Fine-tuned a Qwen2.5-Coder model using LoRA and evaluated generated fixes using CodeBLEU, syntax validation, and execution-based checks. Used AI-assisted Python scripts for data preparation and evaluation.

Technical Skills

Programming: JavaScript, TypeScript, Python, Java, Dart, HTML, CSS

Framework/Libraries: Next.js, React.js, Node.js, Express.js, NestJS, SpringBoot, React Native, Flutter

Backend and APIs: REST APIs, Microservices Architecture, JWT Authentication, OpenAI API Integration

Databases: MySQL, PostgreSQL, MongoDB

Tools: Git/GitHub, Docker, Postman, Jira, Vercel, Neon, Figma, Power BI

Certifications

- Java Object-Oriented Programming – LinkedIn Learning
- GitHub Foundation – GitHub
- Flutter & Dart for Beginners – Udemy

Highlights

- Top 10 Team – JuniorHack 2024 (Software Engineering Students' Association, University of Kelaniya)
- 1st Runner Up – Inter-Faculty Mathematics Competition 2024 (University of Kelaniya)

Volunteering

- Public Visibility Lead – IEEE Student Branch , University of Kelaniya *Aug 2025 - Present*
- Head of Design – IEEE Student Branch , University of Kelaniya *Aug 2024 - Aug 2025*
